

Design 2, Engineering—Electric Vehicle

Windscreen Development —by Linda Street , Korol Yang

CREATION PROCESS

- DESIGN PROCESS
- Product Research
 - Competition Research
 - Developing Design
 - Material Research
 - Manufacturing Process
 - Evaluation
 - Bill of Materials

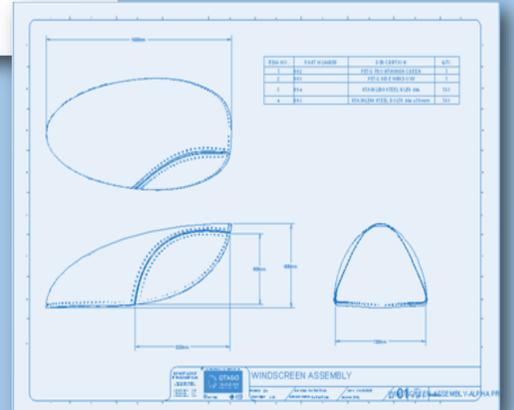

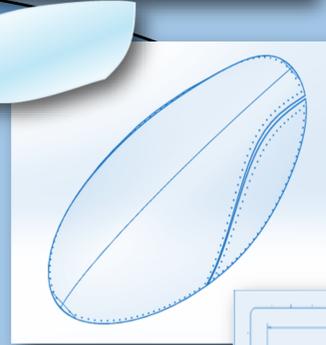

CONCEPT

A Multi-Team Engineering Project to develop an Alpha Prototype of a Two Wheel Electric Vehicle

CUSTOMER REQUIREMENTS

- Light weight
- Ergonomic
- Visibility
- Durable
- Within Budget
- Design Perimeters
- Time Constraints

CONSTRUCTION PROCESS

METHOD OF CONSTRUCTION

- PETG was heated until malleable
- Placed over the form
- Pressure Applied

CHOICE OF MATERIALS

- PETG was selected as the preferred material -
- High Visibility
 - Strength
 - Ease of Manufacture in EPIC Centre workshop
 - Cost
 - Lightweight

Trimmed to fit

- Temporary Fitted into place
- Fix the imperfections

COMPLETION
