## **Become a construction professional and help realise commercial and residential construction projects.**

The New Zealand Diploma in Construction is recognised by employers and industrial, academic and professional bodies - so when you graduate you'll be highly competent and industry ready.

### **What do quantity surveyors do?**

Quantity Surveyors work with clients, architects, engineers, consultants, and local authorities to complete construction projects.

Quantity Surveyors can budget, price, and financially administer construction projects. Typical roles include Consultants, Estimators, Contract Administrators, and Contract Managers. With experience, quantity surveying can lead into the fields of project management, commercial management, and dispute resolution.

### **Benefits of this qualification**

- Quantity Surveying students can join the [New Zealand Institute of Quantity Surveyors \(NZIQS\)](#) as a free student member. Then, after graduating and gaining sufficient industry experience, you can apply for full membership. The NZIQS belongs to the Pacific Association of Quantity Surveyors (PAQS), along with a number of other countries, and has reciprocal agreements with some other Institutes, making it easier to work overseas.
- Upon successful completion of this diploma, you can gain direct entry into the final year of our [Bachelor of Construction \(Quantity Surveying\) or \(Site Management\)](#)

Please contact us if you would like to discuss your study situation. Email [david.finnie@op.ac.nz](mailto:david.finnie@op.ac.nz) or [Construction@op.ac.nz](mailto:Construction@op.ac.nz).
