21 February 2022
18 April 2022 - 29 April 2022

[PORTFOLIO REQUIREMENTS](#)

This qualification introduces you to postgraduate study in a guided learning environment, and is perfect for people who are returning to study after a long break or who desire more personalised guidance and support.

During this programme you will extend and deepen your knowledge and understanding of design research methods and the professional design environment. You will also develop capabilities in design, creativity, sustainability and problem-solving through an applied design project. This project can be individual or team-based and can explore ideas and issues relevant to your design discipline.

Graduates of this qualification will be well-prepared for further postgraduate study such as our [Postgraduate Diploma in Design](#) or [Master of Design Enterprise](#) qualifications, or for employment in a wide range of creative or design management roles.
